

# MONUMENTS OF POWER

**And The Sheer Technological Skill  
That Is Required To Build Them**

The basic concept of *building* a transformer thrives on one core fact. Here is a product that has to stand the test of time. The most exacting ambient conditions will test its fundamental values, which we classify as quality inputs. Today, as pathbreaking technologies redefine the products of tomorrow, we at Transformers...are continuously adopting, adapting, assimilating and activating our ideas into action. Our transformers are customised for global conditions. And also match the stringent norms of international customers. Our pride extends to key European Nations, the Americas and South Asia.

*For us, manufacturing the finest transformers for the world is a vision that has acquired monumental proportions. Which we hope to achieve with sheer power.*

## Power Transformer upto 200 MVA (auto) 220 KV Class

### Product Range

- Generator Transformer • Unit Auxiliary Transformer
- Station Auxiliary Transformer • Power Distribution Transformer
- Furnace Transformer • Interconnecting Transformer (Auto Transformer)
